

## Water Meter Reading System Upgrade

The Township Public Works Department is beginning a program to upgrade the water meter reading system to an Automated Meter Reading System (AMR). All water customers in the Township of St Clair will be affected. This work will require access to the water meter and the external remote at your residence or business. Please ensure they are unobstructed. In most cases the work will be completed in less than one hour. This work will commence May 4<sup>th</sup>, 2009.

St Clair Township employees will be contacting all affected customers on a door to door basis to perform this upgrade and will be carrying photo ID for identification and security purposes. **If you are not home at the time of their arrival a door hanger notification with a phone number will be provided to set up an appointment.**

Some benefits associated with this program:

- ◆ Homeowners will not be billed for this upgrade
- ◆ Increase the speed, efficiency, and accuracy of the meter reading
- ◆ Eliminates the need for most estimated readings
